of Redington

TYPES OF SOLAR SYSTEMS WE OFFER

■ On-Grid Solar System (Net Metering)

- Connected to the electricity grid
- Best for areas with reliable power
- Excess energy sent back to the grid

■ Hybrid Solar System

- Combines on-grid + battery storage
- Power during day, backup at night
- Seamless switching during outages

■ Off-Grid Solar System

- Independent of the grid
- Ideal for remote locations
- Includes battery backup for 24x7 power

◆ COMPONENTS WE USE

- High-Efficiency Solar Panels (Mono/Poly)
- Smart Inverters (Sungrow, Growatt, Luminous, etc.)
- Lithium & Tubular Batteries
- Weather-Resistant Mounting Structures
- Certified Wires & Protection Devices
